Time Matters® and Billing Matters® version 16.1

Release Date: March 28, 2017

Time Matters and Billing Matters 16 Release Notes

Obtaining the Software

Time Matters is available via the download link that appears in your product key email.

For assistance, please visit the Time Matters Support Center, contact your LexisNexis® Certified Partner (CIC), or call LexisNexis Technical Support at 800-387-9785.

Before You Install

Be sure to do the following before installing version 16:

NOTE If upgrading from Time Matters 11 or higher, we strongly advise that you do a backup of your database, as you will not be able to revert back to the Time Matters 11 or higher database after the in-place upgrade to Time Matters 16. The only way in which you will be able to revert back (if necessary) to the Time Matters 11 or higher database will be to replace the upgraded Time Matters 16 database with the Time Matters 11 or higher database backup copy.

- Perform a complete back up of your Time Matters data files and documents.
- Close Time Matters and all open applications on your computer.
- If you or your firm are using Juris Mobility along with Time Matters Mobility, you may experience a loss in functionality with Time Matters Mobility after installing Time Matters. To avoid this issue, first uninstall Juris Mobility and then install Time Matters. Once you have successfully created your Time Matters database, reinstall Juris Mobility.
- If you install Time Matters 16 over Time Matters 10 without first uninstalling Time Matters 10, do not attempt to uninstall Time Matters 10 after the install, as doing so will remove your Time Matters 16 installation.
- If you intend to use the Juris Link features in Time Matters, you must have both Juris and Juris Suite 2.6.1 or higher installed. If you do not have Juris and Juris Suite 2.6.1 or higher installed, you will need to install them prior to installing Time Matters.
- If you are upgrading from Time Matters 7 through 12 and also have Billing Matters, please note that the accounting feature has been removed. The advanced billing feature; however, is still included in Time Matters 15 and later.

What's New in version 16

Below is a summary of the enhanced and new features in Time Matters:

Version 16.1.1.142

No new features or enhancements.

Version 16.1

Program Level Form Autosave

Set the frequency Time Matters automatically saves Form data when in Change Mode.

Quickly Mark Multiple Records as Done/Not Done

Select multiple records and then Mark as Done or Mark as Not Done from the Process menu.

Search Performance Improvement

Search engine upgrade improves performance for document and data indexing and searching.

Timeslips Database Link Browse Window

When linking to a Timeslips database, use the Browse button in the Program Level or User Level setup to locate and select the correct database.

Support for Intuit® QuickBooks® 2017, Timeslips Premium and 2017, Microsoft® Windows Server 2016

Version 16.0

Microsoft® Active Directory® Integration

If your company uses Active Directory, you can create a link between Time Matters and Active Directory that permits users to use one set of credentials to access Windows and Time Matters. Each Time Matters user can be mapped to an Active Directory account.

Calendar Detail View

Display details for Events and ToDos together for multiple staff for a single day using the Detail View button.

Microsoft OneDrive Default File Location

A new option is added to the Microsoft OneDrive setup enable or disable OneDrive as the default location to store documents. This option allows you to exclusively use OneDrive to store documents or select it as option in the Document form.

Monthly and Weekly Calendar View Update

When multiple entries are added to a date that exceed the date's list space, a new flyout window has been added to display all the records for Events and/or ToDo's for a given day without the need to switch to the Daily Calendar view.

Support for Microsoft® SQL Server 2016

Time Matters now supports SQL Server 2016.
